PowerBoom mobile 150

Outdoor Bluetooth® speaker and speakerphone

It makes space for sound ...
... in undreamt-of quality. The seemingly impossible is achieved by neodymium magnets and two dual-class amplifiers, namely an extraordinary acoustics, fitted into an extremely compact design. This makes the PowerBoom miniscule in size, but gigantic in sound!

It loves to go out ...
… and being returned home completely unharmed. Thanks to the durable, shock-absorbing rubber coating of its shell, the PowerBoom is well-suited to casually dangle from your backpack or tent.
A solid Aluminum eyelet keeps it there, always in place, even in strong winds or at a fast-paced march.
No need to get the PowerBoom under cover at the slightest drizzle. Rain or sunshine, no problem! - thanks to IPX5-protection it will effortlessly withstand even strong humidity and light showers!

Music's in the air ...
... without a whole bunch of cables. Connect the PowerBoom to your smartphone instantly via Bluetooth. And while this remains securely protected in your pocket, you can enjoy your favorite music, even during your wildest outdoor adventures.
But it can do even more: When a call comes in on your paired smartphone, the PowerBoom shortly interrupts the music playback and informs you in a discreet tone that someone wants to talk to you. With a single keystroke, you can accept the call and effortlessly answer it via the PowerBoom's built-in hands-free function. As soon as you complete the call - also with a simple keystroke on the PowerBoom - you can enjoy your music from the point where it was interrupted, all without having to take your phone from your pocket .

For long evenings ...
... or if the hike takes longer than planned: With its powerful Li -Ion battery, the PowerBoom is your faithful companion for up to 10 hours.
